NEXT BOARD MEETING

The next board meeting will be the first of the year and will start the move to members' homes instead of the noisy restaurants. This time it's at Bob McClard's home at 1087 Helen, in Yuba City. Starting time is 5:00PM.

All are welcome. Bring your suggestions for the new year. There are several new activities planned, and your input is needed.

BOARD MEETING MINUTES

At the informal Board Meeting at the Christmas party, the only business transacted was setting the schedule for the next Board Meeting in January.

PRESIDENT'S MESSAGE

Greetings Everyone from your new YSARC President. I hope to represent you and reflect the direction you would like to see the club go. I have some ideas for changes in the months ahead and hope you will enjoy them and expect you to pitch in to help too. I know I can count on your participation and suggestions.

With the new Ham Class starting January 10 th at the Red Cross building we all have the opportunity to steer a friend, relative or coworker into Amateur radio via this easy route with lots of Elmer support from Ron and Herb. Meeting on Tuesday and Thursday from 7 to 9 PM the leaders guide the new hams gently into the hobby. With lots of encouragement and study we have a high success rate. All of you are welcome to come and help "teach" /support this newbie class. Last year I saw a faithful David WD6SCD attend the classes and support his two sons in law in their successful ham license quest. Good job David! Other club members also came at times and did the same. We had fun and even had some laughs as some of the Old Men talked of times past and now the present and future of Ham Radio.

Some would say that one of the things that make the "old timers" a bit more well-rounded in this hobby is the fact that when we were first licensed, there weren't any handy-talkies, and repeaters were something very new, just getting started with no standardization, and there was a lot of room for experimentation.

Now some comments on a first radio:

It was literally impossible to "start out in ham radio" by buying and using a handy-talkie. Even if you could find one, there would be nobody to talk to.

So, we did other stuff.

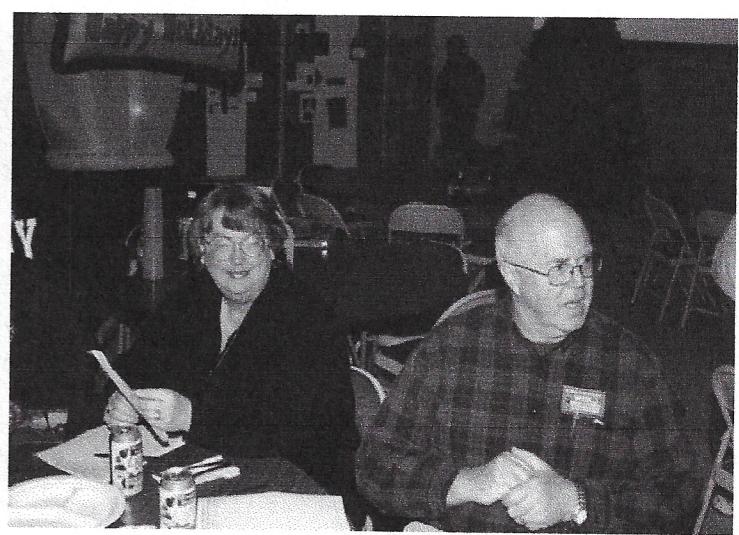

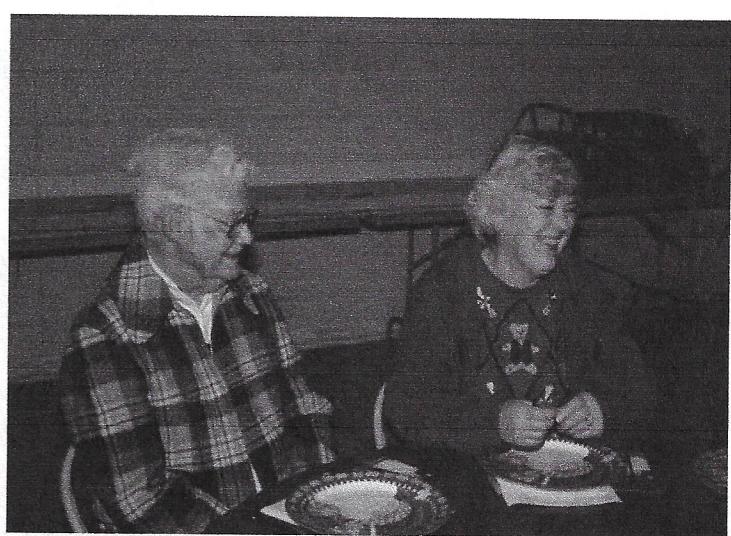

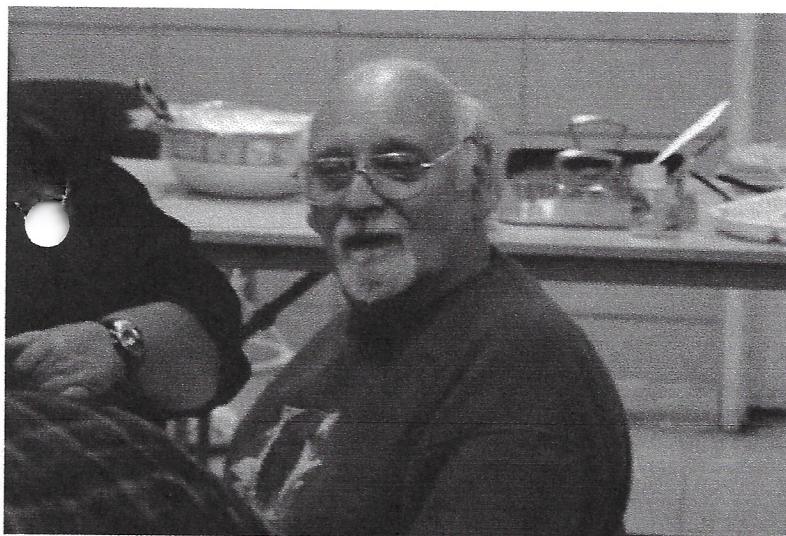

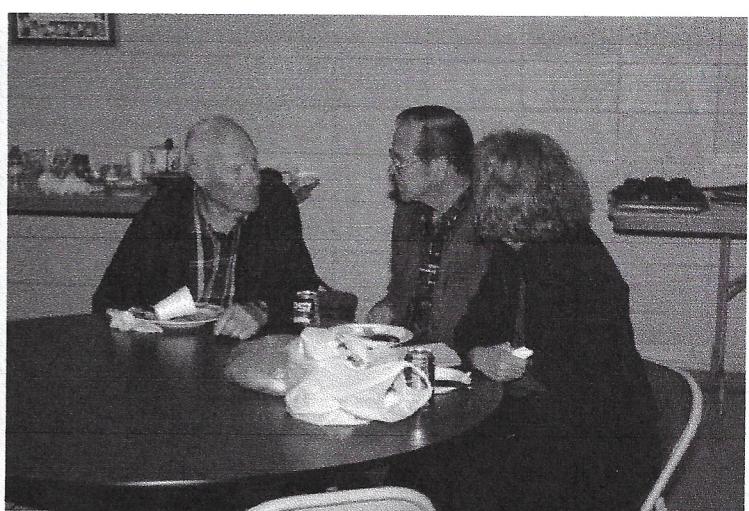

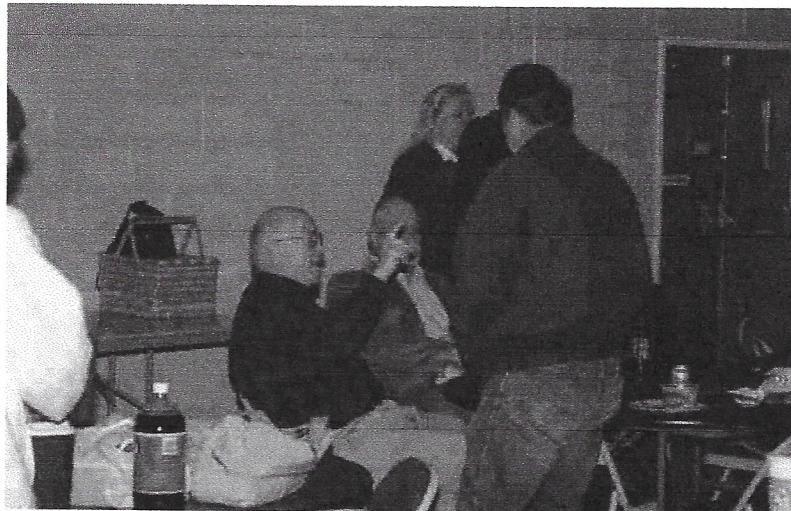

As a new Novice in 1960, and a young kid (15 yrs), I was having too much fun building antennas and working 40/80 meter CW on my used AT-1 transmitter and BC224 receiver. I am saddened that new hams today almost always do not have that kind of fun. But, a place we did have fun that is still available today is 2 meters... yes, a novice could use 2 meters then. I bought a used 2 meter AM 6 watt rig called a Gonset Communicator II for \$100. This was a dream of a rig. A box-like transceiver with a green tuning eye in the center staring at you as you spoke. What fun we had.

Everything was simplex then so I would carry the Gonset between my feet on the motor scooter to the top of a mountain (Diablo, Tamalpais, or Grizzly Peak) and operate portable not too unlike some of our portable operations on Field Day or Cal-QSO Contest. I carried a long extension cord and plugged it into any nearby electrical outlet and ran it up to the rig... in a tree or as high as I could get. My best stories revolve around taking my buddy (Gonset Communicator II) up to an empty wooden water tank on Grizzly Peak and operating the June VHF contests in 1961 and 1962. I made over 100 contacts using a 19" whip stuck on the top of the rig... I still have this wire whip.

I hope you can have as much fun as I have had... 73 and see you on the air... Bob W6OWH

PICTURES FROM THE CHRISTMAS PARTY

On the previous page are a few pictures of the Christmas party taken by Herb, W6HBU. Upper left: Ron, W6KJ, makes a point. Center left: Ted, W7RX, enjoying dinner. Lower left: Pat, WD6ECC, in deep thought. Upper right: Marvin, KE6JNT, discussing problems of the world with Lee, KC6MCI and his XYL Wilma, KE6ZCR. Center right: Art, W6ARN, and XYL Carol, KF6VBT. Ron, W6KJ, and XYL JoAnne, N6YLO.

EDITOR'S RAMBLINGS

This is the month that we start the new year with new officers and Board members. President Bob, W6OWH, has hit the field running with lots of new activities and ideas up his sleeve. The attached 2006 schedule of Club Events gives you a tentative list of the things he has planned. As always, he will need your help and backing to make things happen. Don't let him down.

We start the Technician class this month with a first sign-up of about 17 students. That is about the most in my memory. Ron and I are looking forward to shepherding these people into the hobby, and we will need lots of Elmers to give the new people the help they will need as they go along. Once again, don't let them down. Each of us has something to offer the new guy or gal, and we owe it to the hobby to be there to provide that support.

As this is written, it is between storms, and there are numerous reports of flooding and road closures due to the rain. Thus far, there has been no call-out for the amateurs, but I hope you, like me, have the necessities to go where needed on a moments notice. Let's hope this one is contained by the river and levee system. I don't care to get my feet wet.

AMATEUR RADIO VANITY CALL SIGN PROCESSING WILL RESUME JANUARY 4

The FCC has announced that routine processing of Amateur Radio vanity call sign applications will resume Wednesday, January 4, 2006. The Wireless telecommunications Bureau (WTB) suspended vanity processing in September as an indirect result of its hurricane-related extensions of certain regulatory and filing deadlines. This is good news for one of our local hams Jim KG6FGJ who has been waiting since September for his new easy to remember Vanity Call... finally the call will be issued!
